

47 ARIES V K (24/36-LED)

Technical data:

- Power: **~220-240V / 50-60Hz**
- Ambient/work temperature : **-40°C do +40°C**
- Protective class: **I or II**
- Ingress protection code: **IP66**
- Mechanical impact protection code: **IK10**
- Surge protection: **to 10kV**
- Life time: **L90, B10 >100 000h (for G5)**
L80, B10 > 100 000h (dla HE)
- **CRI: 70 or 80 for G5,**
-CRI: 70 for HE, UHE
- Controls method: **1-10V, DALI, Ampdim, Dynadimmer,**
as an option - socked ZHAGA with SR driver (D4i),
external surge protector 10kV/5kA
- **Photobiological risk group RG1**
- **Weight 13 kg (dependant on type)**

Construction:

The unit consist of a body. A shade is mounted to the luminary body with a ring. A disk separating electrical compartment from lighting compartment, is attached to a luminary ring. A LED light sources radiator is settled to the disk. LED modules are mounted to the radiator with a set of lenses, by screws. The modules are powered with a power supply. The luminary is sealed with a gasket. As an option, we equip the luminary with a ZHAGA socket .

Mounting instructions:

- *)- Screw the LED light sources with a lenses and radiator to the disk.
- *)- Connect the electrical cables according to the scheme.
 - Mount the shade to the ring with gasket.
 - Attach the disc to the ring and secure its position.
 - Close the housing and secure it with a clip
 - The luminary is mounted to the lantern with a M20 thread(hanged luminary).

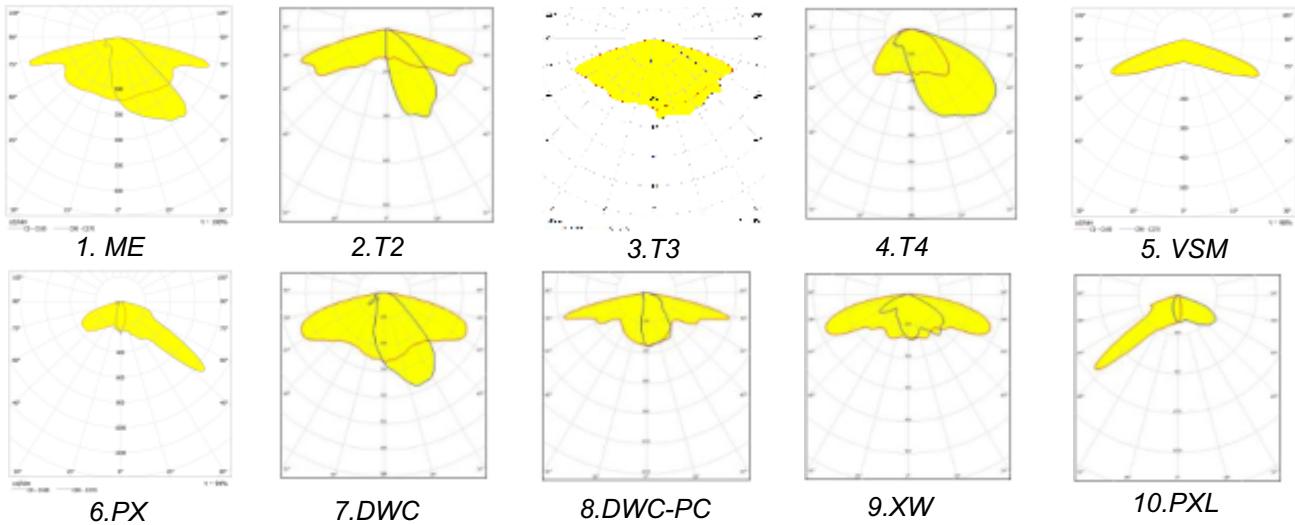

If any lantern elements are supplied factory-mounted, the mounting stages marked with *) should be omitted (as this has already been done by the manufacturer).

Luminous flux values shall be declared for ambient temperature 25°C. The class of modules used assumes 5% tolerance of the declared luminous flux value. The weight of the unit may slightly differ for individual production batches.

Versions/assembling:

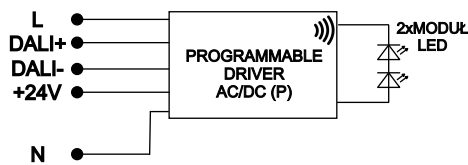

Construction:

The unit consist of a body. A shade is mounted to the luminaire body with a ring. A disk separating electrical compartment from lighting compartment, is attached to a luminaire ring. A LED light sources radiator is settled to the disk. LED modules are mounted to the radiator with a set of lenses by screws. The modules are powered with a power supply. The luminaire is sealed with a gasket. As an option, we equip the luminaire with a ZHAGA socket).

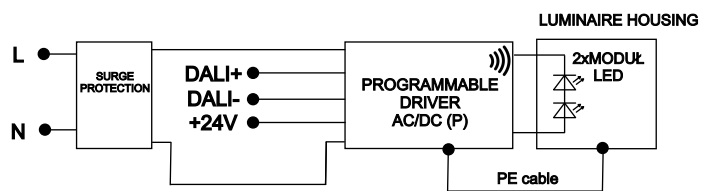

Mounting instructions:

- Screw the LED light sources with a lenses and radiator to the disk.
- Connect the electrical cables according to the scheme.
- Mount the shade to the ring with gasket.
- Attach the disc to the ring and secure its position.
- Close the housing and secure it with a clip
- The luminaire is mounted to the lantern with a M20 thread (hanged luminary).

Electrical diagrams:

1. Light source LED
(basic version - programmable driver)

2. Light source LED (Protection class II)
(version as an option - Sensor Ready driver)

-programmable driver (P) enables programming of a five-steps power reduction, surge protection to 10kV

-programmable driver (SR) enables to be powered wireless communication devices, via a ZHAGA socket, surge protection to 10kV

-detailed specifications of the power supplies include catalogue cards of their manufacturers, which we provide on request
